## 2023 Innovative Talent Program China Scholarship Council —— The University of Manchester

The University of Manchester is part of the prestigious Russell Group of universities, with outstanding facilities and the widest range of courses. It is highly respected across the globe as a centre of teaching excellence and innovative research. With 25 Nobel Prize winners among its current and former staff and students, the university has a history of world firsts and brilliant discoveries, from splitting the atom to giving the world graphene.

**The Faculty of Biology, Medicine and Health** delivers a truly translational approach to the life sciences, from pure discovery science through to clinical application and patient care. It develops and delivers the highest quality education and training for health professionals and life scientists in partnership with the NHS and industry, contributing to the University's tradition of innovation and improvements in the health of people around the world.

The Innovative Talent Program funded by the China Scholarship Council (CSC) supports Chinese students to study full PhD degree or joint supervision. The University provides an ideal training platform for graduate students and young scholars who value their self-development and wish to go abroad for scientific research and training.
